DIARY No. 140

1913-14

SECTION Q. Gen

No. 31 of 13

Ex No. 34

To

The Secretary to the Government of His Highness the Maharajah of Mysore in the Department of Industries and Commerce, Bangalore.

Sir,

In reply to your No. G.8261-2 dated the 30th June 1913, I have the honour to report as follows regarding the work done by the four Officers placed at the disposal of the Industries and Commerce Committee in G.O. No. G.270-5-G.M. 36-11-173 dated the 11th July 1912.

(1) Mr. G. Subbusamy Iyer.

Up till the end of January, Mr. Subbusamy Iyer was mainly employed on work in connection with the Dasara Industrial Exhibition, and he only made a few unimportant industrial inquiries in regard to wood carving and metal work in Mysore. He was also engaged in the negotiations regarding the establishment of a tile factory in Mysore which came to no useful result. From January onwards, he has been in charge of the sugar cane crushing plant which he erected at Saggere under the Mavatoor tank, and in connection with the working thereof he has done some very useful work..

(2) Mr. M. Bavasahib Miyan.

Mr. Bavasahib Miyan was mainly employed last year in conducting experiments in the manufacture of products in lac. The experimental work is still going on, but I have no great hope that it will lead to any

large development, as Mr. Bavasahib Miyan is not capable of conducting the work on a scientific basis. The experiments have cost very little money, as the sale proceeds of the lac manufactured have covered the cost of the raw materials and labour employed in the work.

Mr. Bavasahib Miyan has done more useful work in connection with the silk industry, about which separate reports have already been submitted to Government. This work is still in progress, and the wood work for a new filature to be started in Channapatna is now being constructed there under Mr. Bavasahib Miyan's supervision. Since the establishment of the Department of Industries and Commerce , and the transfer of the Channapatna Industrial School to that Department, Mr. Bavasahib Miyan has also been in charge of the School.

(3) Mr. S. Raghavendra Rao.

Mr. S. Raghavendra Rao spent some time in the Madras Presidency inspecting installations erected by the Department of Industries there, and was afterwards on tour in the Districts for several months investigating the possibilities of water supply for irrigation by pumping. At the end of November, he was placed in charge of the sugar cane plant which was ultimately erected near Kunigal. I regret that I am not able to commend his work, though I think that latterly he has been doing better.

(4) Mr. B. Sitharamachar.

Mr. Sitharamachar was also deputed to Madras for a short time, and was put in charge of the erection of the sugar cane plant at Haravu. He took an unnecessarily long time for the erection of this work, and since its completion he was transferred to Harihar to erect an engine and pump on the banks of the Tunga for Mr. Bhimappa Bondeday. Owing to mistakes made by Mr. Bhimappa Bondeday who
